Vitamins to VEGA!

13th. November. 2024

VITAMIN

01

This week, it was reported that some folic acid manufacturers stopped production and stopped reporting for a short period of time, but the market feedback was flat. Since the beginning of this year, folic acid has been at a low market level, with current export quotations of USD22.5-23.5/KG. Compared with other vitamins, folic acid accounts for a small proportion of demand in feed, and the market performance is also slightly low-key. You can pay attention to the factory quotations in the future.

AMINO ACID

02

Threonine: The market price is around USD 1500/MT. Some products are sold in combination. The quotations in the trade market are relatively strong. The inquiries in the high-priced market are average. At present, the factory mainly delivers goods, and the end users purchase on demand and are cautious in signing orders. It is expected that the threonine market will remain stable at a high level in the short term. Pay attention to the signing of orders by customers.

API

03

Tylosin, Tilmicosin Phosphate - All major factories have raised their quotations, and the market inventory is being consumed rapidly. We need to pay more attention to the follow-up. It is judged that the price will stabilize and adjust. The price of Tylosin Tartrate is currently around USD29.5/KG, and the price of Tilmicosin Phosphate is around USD34/KG.

FOOD ADDITIVE/ Sucralose

04

Jiabiyu recently issued an announcement, announcing that the company plans to acquire 65% of the equity of Shanghai Ouyi Biomedical Technology Co., Ltd. by issuing shares and paying cash, and issue shares to raise supporting funds. The company's stock will resume trading from the opening of the market on November 12, 2024. Jiabiyu is a high-tech enterprise based in the field of synthetic biology, focusing on the research and development, production and sales of polyunsaturated fatty acids and fat-soluble nutrients. Its products are widely used in human nutrition, animal nutrition and personal care.
