

# VEGA DAILY

Vitamins to VEGA!

7th. Jan. 2025

## VITAMIN

01

On January 6, according to market feedback, the mainstream folic acid factory signed a unit net price of USD 48.5/kg for feed-grade folic acid and net price USD 60.6/kg for food-grade folic acid.

## AMINO ACID

02

Valine: Manufacturers' quotations are stable, but actual orders are few. The trade market quotes USD 1.89-2.02/kg. The end-users' restocking progress before the Spring Festival is basically completed, and the market buying and selling atmosphere is not positive. Pay attention to the delivery situation and market transactions. It is expected that the price of valine may adjust in a narrow range. Pay attention to the progress of the EU's anti-dumping case against valine originating from China.

## API

03

On January 2, the official website of the High-tech Enterprise Certification disclosed an announcement on the filing of the first batch of high-tech enterprises certified and reported by the Shandong Provincial Certification Agency in 2024. Shandong Zhongmu Veterinary Medicine Co., Ltd. was on the list, with certificate number GR202437001123 and issuance date of January 2, 2025.

## FOOD ADDITIVE

04

Affected by market conditions and rising raw material costs, Anhui Jinhe has raised the price of the food sweetener sucralose to FOB USD 30.3-30.5/KG. The possibility of further price increases for sucralose in the future cannot be ruled out. Currently, end users mainly purchase on demand, but may prepare some inventory to cope with the continued price increase trend in the future.
